IMPORTANT: PRODUCT CARE INSTRUCTIONS

CUSTOM UNIFORM CARE INSTRUCTIONS:

To enhance the appearance and extend the life of your uniforms, adidas recommends that you follow these cleaning and storing procedures:

- Do not dry clean
- Do not wash in hot water
- Do not use chlorine bleach
- Do not use fabric softener
- Do not wash whites and colors together
- Do not overload the washing machine
- Do not machine dry on high heat
- Do not leave wet or damp garments in your travel bag, in a pile with other clothing or in washing machine
- Before using uniforms for the very first time, it is recommended that they be washed in cold water and hung to dry or machine dried on the lowest setting
- Uniforms should always be laundered immediately after wearing.
 - However, if this is not possible, rinse garments and hang individually on rust-proof hangers
- (Moisture may cause color migration of acid dyes so we advise separating wet or damp uniforms.)
- Belts and any other contrasting color items should be washed separately from the garment
- It is always advisable to test wash a single uniform according to directions before washing an entire load.
- We recommend presoaking heavily soiled garments in cold water with a protein release agent.
 - Follow the instructions recommended by the presoak manufacturer.
 - Wash garments immediately following the presoak in the normal wash cycle
- Wash and rinse all garments in cold water with mild detergent.
 - Remove promptly after wash cycle to avoid color migration.
- For optimum results, hang garments (especially those with Spandex) to dry.
 - If you cannot hang dry, machine dry on the lowest setting.
 - Turn jerseys inside out before machine drying.
 - Remove items from dryer immediately upon completion of cycle.
 - Excessive heat can cause fabric shrinkage discoloration, and cracking and peeling of vinyl plastisol lettering inks.
- Make sure uniforms are completely dry before storing.
 - Store in a dry area to prevent mildew
 - Protect them from sunlight and fluorescent light to prevent yellowing

PLEASE NOTE:

adidas will not be responsible for uniforms that are damaged due to improper care and maintenance.

Failure to follow our specified care instructions will void all guarantees.

For pre-washing, here is what is recommended:

- It is recommended that a new set of uniforms be laundered before wearing; in lukewarm (100 F) water using a mild detergent.
- Please let us know how the uniforms that were stained do today.

Here is more info for continued care and washing. This below info is sent with every order:

- UNIFORMS: should be laundered immediately after they have been worn. Color transfer (bleeding) may occur when in perspiration soaked garments are left in a pile or folded one on top of another for any period of time. Garments that cannot be laundered at once should be hung individually on rust-proof hangers (plastic or wooden). All items are not a part of the garment; i.e. belts, pads, etc., should be removed and laundered separately. As an extra precaution, wash one jersey/pant, inside out, if results are acceptable, proceed with the balance.
- PRE SOAKING: Garments made of Antron Nylon or Spandex that are unusually soiled or stained can be pre-soaked in lukewarm (100 F) water with a pre-soak agent for no longer than one hour. Cold or Hot water can cause color transfer. Garments should be laundered immediately after pre soaking! Pre-soak agents such as Tide, Cheer, or Wisk are not endorsed by adidas, but appear to work best.
- WASHING: Rinse washing machine before laundering garments. Most garments can be laundered and/or rinsed in lukewarm water (100 F). White and colored garments cannot be washed together, was separately by color. Use mild detergent (PH under 10), when used following instruction, produces good results.
- Water level in machine should be higher than garment level which will reduce mechanical action. Remove garments immediately after wash cycle is finished to avoid color transfer.
- Bleaching is NOT recommended. DO NOT USE CHLORINE BLEACH. As it will fade colors, weaken fabrics, and cause color transfer/bleeding. A light application of granular oxygen-base bleach is recommended on any white garment requiring bleach. DO NOT USE DE-STAINERS OR SOFTENERS as these added agents may DAMAGE the uniform.
- DRYING: Garments should be air dried on rust-proof hangers (plastic or wooden). If machine drying is necessary, dryer should be at lowest temperature or "air-on-ly" setting. Uncontrolled heat will results in uncontrolled shrinkage or damage to lettering of garments. Remove garments from dryer at completion of drying cycle.
- DO NOT DRY CLEAN GARMENTS. Dry cleaning may discolor and ruin imprint names and numbers.
- DO NOT IRON OR PRESS GARMENT.
- Dry garments completely before storing. Storing garments in a cool, dry area protected from sunlight and flourescent light will prevent mildew or yellowing.
