STRIKE ATTACK[®] by Sports Attack

MACHINE PERFORMANCE

Battery-powered machine provides reliable service on any soccer field or playing surface. AC unit also available.

A realistic curve and bend of the ball can be consistently delivered and easily controlled.

Balls can be thrown with the desired amount of spin or without any spin.

Balls can be delivered up to 75 MPH at a distance of 70 yards or more.

The type of spin, height and direction can be locked into place to ensure precise repetition focused on your specific training objectives.

Direction, speed and distance can be instantly changed for specific goalkeeper training.

The long ball feed makes it easy for the coach to operate the machine from a standing position.

Handle enables the machine to be quickly moved to different areas of the field.

Heavy-duty, wide-tread wheels allow machine to be moved on any surface.

Battery and rear-leg assembly is easily removed for transport in an SUV.
