NEW
V1 FIELDER'S GUARD

FIELDER'S GUARD **FEATURING A BUILT IN VISOR**

The Best Custom House in softball has just gotten better. An all-new Fielder's Guard - the V1 - makes its debut this year! A game-breaking new visor integrated directly into the guard! Plus, you'll have all new Aqua Tech finishes to choose from, as well as new custom paint colors, styles and finishes. See the all-new V1 Fielders Guard with Visor on page 18.

Creating America's Best Custom Gear for America's Best Custom Athletes

Expanded Polypropylene is an advanced protective system that's significantly lighter than the traditional foam inside most batters helmets. In fact, EPP is one of the lightest protective materials on the market. Yet, it doesn't sacrifice performance.

Our EPP impact absorption liner is part of a three layer protection system in the XR1 and XR2 batters helmets. It distributes the load and energy of impacts across the entirety of the helmet shell, effectively dissipating that energy away from the player.

The EPP impact absorption liner is uniquely formed and ventilated to maximize performance and air flow throughout the helmet.

SchuttTM

We've made great advancements in impact absorption on the football field. We've migrated that technology into our batters helmets - the same state-of-the-art TPU Cushioning. On the football field, TPU Cushioning absorbs more impact across a wider variety of temperatures than any other helmet - and that same performance is available in our AiR MAXX 2966 and XR batters helmets.

The logo for D30, consisting of the letters 'D30' in a white, bold, sans-serif font, with a registered trademark symbol (®) to the upper right. Below the logo is a horizontal row of seven orange dots of varying sizes, with the largest dot in the center.

D30[®]

A great fit and performance, thanks to Energy Lock Technology, powered by D30[®]. A soft, comfortable and high-performance impact absorption system, D30[®] is a uniquely engineered and patented protection system. It offers a significant advantage over traditional foam padding featured in other helmets.

HELMET FITTING GUIDE ▼

STEP 1

Measure the circumference of the player's head at its widest point, about 1" above the player's eyebrows.

STEP 2

The helmet bill should be parallel to the ground, 1" above the eyebrows. If a faceguard is attached, you should have an unobstructed view.

STEP 3

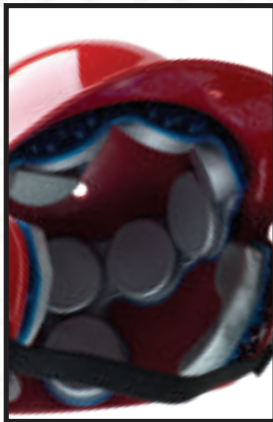

Helmet should fit snug, without pinching or feeling too tight. Helmet should NOT move independently of the player's head.

STEP 4

Give the bill of the helmet a solid tap while the player is wearing it. The helmet shouldn't move. If it does, the helmet is too big.

THOUSANDS OF COLORS

We strive every day to make the equipment that makes our athletes the best they can be. Performance is our top priority. But we also know, unless an athlete likes the way they look in our gear, it stays on a shelf somewhere.

So, we've built a vast library of colors and finishes - hundreds of thousands of possible combinations: custom paint colors, Aqua Tech graphics, finishes and decal combinations. It's all part of the job description for being your Custom House for helmets.

We make America's best helmets for America's best teams.

DeadOn Strike Zone Trainer 12845206 SEB-BTP

The DeadOn Target Training System is not only training the body but the mind as well. The patented design of DeadOn Sports Precision Targets gives a visual imprint unlike any other sports equipment. It goes beyond your regular training aspects by using mind mapping to increase accuracy and consistency. Most would agree that accuracy is built by increasing concentration and focus, and the small DeadOn targets encourage these.

STRIKEZONE

DO 15 TARGET

ACCURACY BUILDING TARGETS It could mean the difference between a narrow victory or heartbreaking defeat. DeadOn Sports Target Training System increases accuracy and consistency by giving you a precise point of impact while blocking out visual noise for maximum concentration.

VERSATILE DESIGNS The versatility of the design makes it an ideal multi-sport training device. The frame can be outfitted with a strike zone for softball or baseball pitching and fielding practice. It's also ideal for football quarterbacks and long snappers, as well as volleyball setters and hitters.

DURABLE CONSTRUCTION The frame is built from 16-gauge steel tubes and the target sheets are created from ultra-durable 18-oz vinyl. All the parts withstand the hardest impacts at all levels of play. You can expect years of use from your targets.
